

sjbes' Sources of Information

Summer 2016

Below is a list of news sources, political advocacy groups, and social/justice organizations which have been associated with **sjbes' Mission** for the past 11 years. Most of these entities started out small - 1 to 2 people outfits but since have grown into influential movements for national and global events happening now. Being "poor in Spirit" the only contribution **sjbes'** could afford was giving of our time and effort in supporting their mission by spreading their news, themes, and/or projects using our social networking which was mainly by our emails, web pages, and then around 2006, posting them on Facebook and Twitter.

In the course of trying to manifest **sjbes' Mission - School, Support and Sanctuary** down in Cross Canyon, Utah I have had the privilege of meeting some of these determined individuals who were hoping as I was to awaken souls, enlighten consciences, change local/state/national/global laws, stop the 'Culture of Death', win spiritual battles against evil and for spreading the Good News. Over time, some of these people and groups merged with other like-minded movements or changed their names for gaining better clarity and awareness for their mission. Yet for the most part, one has to be at awe of these people and groups for their courageous passion in wanting to make the world a better place so that God's Divine Plan could manifest not only for these United States of America, but for all nations.
